HINA KHADIM

Full Stack Developer at ByteCorp
Karāchi

Summary

A final-year student of Software Engineering at Ned University of Engineering and Technology, who has a passion to learn new technologies. I am a Full Stack Developer mostly working on MongoDB, React Js, Node Js, Express, Redux, React Hooks, Python, and have a love for Machine learning and Artificial Intelligence.

I always dreamt to be a Software engineer because I am always eager to know how software solves real-world problems. Technology is here to create solutions and that's the reason I fell in love with software Technology.

I have completed 30DaysOfJavascript and developed more than 10 Projects in Javascript.

I have great communication skills and can easily adapt the new skills. I love to work in teams to collaborate more and help each other to create outstanding and amazing solutions with team power.

I write tech blogs on Medium.

Have a love for open-source contributions.
