Multiplanetary Space Exploration & Innovation - MSEI

Founder, Global Exponential Innovator, Visionary Leader, and Owner of MSEI

February 2017 - Present (5 years 2 months)

Stockholm, Sweden

Website: <http://www.exponentialtechs.com/space/agh/>

- Founded my MSEI (startup) on 17/07/2017. Emerging Technologies Sweden is the present moving towards the future. MSEI is the future! They represent who I am, and who I am on my way to becoming.
- MSEI is an ExO in the development phase.
- Title: Founder, Exponential Innovator, and Visionary Leader (working remotely). Head of HRI & AI Robotics (Space Industry).
- Hands-on experience working with innovation in the form of Space projects.
- Working with GGC (Global Grand Challenges) and Space challenges, applying a Human-Centered Design, Human-Computer Interaction Design, and Human-Robot Interaction Design approach.
- Working with pioneering innovation projects.

Gigstr

Designer, Developer, and Marketer

January 2022 - Present (3 months)

Ongoing remote projects via Gigstr for different clients and industries. I recently joined and am part of several recruitment processes. Waiting for my first remote gigs via Gigstr.

I have never seen such an active company as Gigstr. They are fast and very effective. Gigstr is very open-minded and we hope that more companies will follow. Nowadays, it is very important to be able to work remotely and companies are not ready for sudden changes. Gigstr solves this gap and aligns with my way of thinking and working. Furthermore, for us remote workers, Gigstr opens up the doors and bridges the gap between candidates and companies. It also is a changemaker, something we really need in Sweden and the world.

The world is changing at an exponential speed and we are happy to be part of the changes that lead to a better world that gives everybody equal opportunities.

What I know as an Entrepreneur is that we live in the trillion-dollar gig economy! We raise the glass to Gigstr!

Remember: Innovation is not a straight line and there can be more than one way to solve a global challenge!

Millionaire Mind Online (MMO)

Affiliate Marketer

October 2021 - Present (6 months)

Affiliate Marketer for MMO, promoting Harv Eker's digital products. Harv Eker is one of my Trainers. It is an honor!

Gathering the material and launching asap.

Taskflex

Student Freelancer - Contract

October 2021 - Present (6 months)

Denmark

Freelance remote work via Taskflex based in Denmark. I offer online services as a Designer, Developer, and Marketer.

Taskflex is doing a great job in helping students get experience in different areas.

I am happy to have joined Taskflex-

Nowadays, we all know that the global market lacks roles for Junior Developers, Junior Designers, etc. I see that Taskflex has understood this gap very well. This indirectly targets the gender equality gap which I am very focused on solving as well. Companies do not understand that there is a huge danger in only publishing Senior roles because they make the gap even larger and create a negative impact overall. It is not a question of offering women education but also jobs. Both are equally important. Companies keep striving to spend less and get more. At the same time, big companies keep spending billions of dollars to solve the gender equality gap. There are 2 actions that are going in different directions. Diversity and inclusion are words that are being tossed around without understanding that it is very easy to fall into the trap of not being neither diverse nor inclusive. Only hiring Senior Designers and Senior Developers is NOT being neither inclusive nor diverse.
