_____

Experience

Amazon Web Services (AWS)
Senior Product Manager - Technical
December 2021 - Present (4 months)
Seattle, Washington, United States

Senior Product Manager - Technical @AWS

AWS Managed Services (AMS) helps you operate your AWS infrastructure more efficiently and securely. Leveraging AWS services and a growing library of automations, configurations, and run books, AMS can augment and optimize your operational capabilities in both new and existing AWS environments.

IBM
4 years 6 months

Technical Product Manager
January 2018 - November 2021 (3 years 11 months)
Chicago, IL

Technical Product Manager, IBM Data & AI.

The products and experiences that I build solve problems in Data Governance, Data Science, Machine Learning Training and Deployment, Artificial Intelligence, Mathematical Optimization, Bias and Fairness in AI, and Machine Learning Operations (MLOps) for enterprises and garage startups alike.

I lead the Machine Learning Operations product roadmap in our data science portfolio focused on OpenShift, Kubernetes, Kubeflow pipelines, and related technologies for our Hybrid Cloud Platform, Cloud Pak for Data, available as a standalone installation or as a Service on IBM Public Cloud.

I also lead the product roadmap for Watson Machine Learning in IBM Cloud.

Some of the other products that I contribute to include Watson Studio, Watson Knowledge Catalog, Decision Optimization, and Watson Open Scale.

I also work closely with IBM Research and Open Source leadership to bring cutting edge technology to the community and to optimize the experience in our products.
